

Ramya Mannam

+91-9010811287 | ramyamannam7@gmail.com | Ongole, India
GitHub | LinkedIn

Professional Summary

Computer Science student with experience in full-stack development, AI-powered applications, and scalable backend systems. Skilled in Python, FastAPI, React.js, REST APIs, MongoDB, and Machine Learning fundamentals. Experienced in building intelligent web applications using LLM workflows, RAG systems, and modern software engineering practices. Passionate about Artificial Intelligence, backend engineering, and scalable enterprise applications.

Education

B.Tech – Computer Science and Engineering	2023–2027
RGUKT IIIT Ongole	GPA: 9.0/10
Pre-University Course (MPC)	2021–2023
RGUKT IIIT Kadapa	GPA: 9.70/10
Class X	2021
Sri Saraswathi Vidya Mandir High School	GPA: 10/10

Technical Skills

Languages	Python, JavaScript, TypeScript, C++, Java, SQL
Frontend	React.js, HTML, CSS, Tailwind CSS
Backend	FastAPI, NestJS, REST APIs, Node.js
Databases	MongoDB, PostgreSQL, MySQL
Tools	Git, GitHub, Postman, VS Code, Vercel, Render, Railway
Core Concepts	DSA, OOPs, API Design, Problem Solving
AI / ML Concepts	Machine Learning, LLM Applications, RAG, Prompt Engineering, AI Workflows, Data Analysis, Scikit-learn, Pandas, NumPy

Projects

StackSpend AI – AI Subscription Audit Platform	<i>Next.js, FastAPI, Python, Tailwind CSS</i>
[Live Demo] [GitHub]	

- Developed an AI-powered platform for analyzing and optimizing AI subscription expenses.
- Built responsive dashboards for tracking subscription expenses, audit reports, and AI usage analytics..
- Created scalable backend APIs using FastAPI for report generation and subscription management.
- Integrated LLM-based recommendation features to identify redundant AI tools and reduce costs.
- Implemented AI-powered workflows for automated optimization suggestions and personalized insights.
- Integrated LLM-based workflows and Retrieval-Augmented Generation (RAG) concepts for intelligent recommendation systems.

RenewMate – Subscription Management System	<i>React, Node.js, PostgreSQL</i>
[GitHub]	

- Developed a subscription management platform for handling recurring payments and billing operations.
- Implemented JWT-based authentication and secure REST APIs for user and subscription management.
- Built machine learning based recommendation features for personalized user insights.
- Integrated Retrieval-Augmented Generation (RAG) workflows for intelligent financial recommendations.
- Automated reminder notifications and designed dashboards for subscription and expense monitoring.

Certifications

Artificial Intelligence & Machine Learning Program	PrepInsta Prime [Certificate]
System Design Fundamentals Certification	Completed [Certificate]
AI Search Methods	NPTEL [Certificate]

Achievements

- Solved 200+ DSA problems on LeetCode and CodeChef.
- Strengthened problem-solving skills through competitive programming.
- Maintained excellent academic performance with high GPAs across all levels.
