

RAMYA MANNAM

Software Developer — Full Stack — Machine Learning Enthusiast

ramyamannam7@gmail.com — +91 9010811287 — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Career Objective

Software Developer with expertise in **full-stack development**, **machine learning**, and **system design**. Experienced in building **scalable web applications** using modern technologies. Seeking to leverage technical skills to develop **high-impact software solutions**.

Education

B.Tech – Computer Science and Engineering	2023–2027
RGUKT IIIT Ongole	GPA: 9.0/10
Pre-University Course (MPC)	2021–2023
RGUKT IIIT Kadapa	GPA: 9.708/10
Class X	2021
Sri Saraswathi Vidya Mandir High School	GPA: 10/10

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL, C++
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, NestJS, REST APIs
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, Postman, Cloudinary, Razorpay, Resend API
- **Concepts:** Data Structures, Algorithms, System Design, JWT Authentication, Machine Learning, RAG
- **Technologies:** REST APIs, Authentication, Payment Integration, Cloud Storage, API Integration

Projects

Eventz – Event Management Platform	React, NestJS, MongoDB
Code — Live	

- Developed a **full-stack application** for event creation, registration, and **lifecycle tracking**.
- Implemented **JWT authentication**, **REST APIs**, and scalable backend using **NestJS + MongoDB**.
- Integrated **Razorpay** (payments), **Cloudinary** (media storage), and **Google Maps API** (location).
- Built **real-time event status logic** and **email notifications** (Resend API).
- Handled **100+ API requests/day** supporting **50+ users**.

RenewMate – Subscription Management System	React, Node.js, PostgreSQL
Code — Live	

- Built a **subscription management system** for tracking **recurring payments**.
- Implemented **JWT authentication** and scalable APIs for **flexible billing**.
- Developed **machine learning model** for **user behavior prediction** and recommendations.
- Integrated **RAG-based system** for intelligent insights and personalization.
- Automated **email reminders** and built dashboard for **financial analytics**.

Certifications

• Software Architecture & System Design Foundations – ScholarHat [Link]	Apr 2026
• Cloud Computing – Score: 82% [Link]	Jul–Oct 2025
• Artificial Intelligence: Search Methods – Score: 67% [Link]	Jul–Oct 2025

Achievements

- Solved 200+ DSA problems on LeetCode and CodeChef.
- Strengthened problem-solving skills through competitive programming.
- Maintained excellent academic performance with high GPAs across all levels.
